

Slide 1 — Scrollchain PEI Introduction

Private Equity Infrastructure Engine

Build. Tokenize. Yield.

Slide 2 — The Opportunity

- Global plastic + tire waste = \$110B+ problem
 - Scrollchain deploys gasification + AI vaults to convert waste → clean gas
 - VaultTokens linked to real infrastructure, tokenized on-chain
-

Slide 3 — The Model

- ScrollBuild Construction Node wins sovereign contracts
 - Vaults issue NFTs to LPs
 - Token flows = % of revenue from infrastructure builds
-

Slide 4 — Investor Yield

LP Tier	Yield Method	Bonus
Tier 1	Revenue share + governance	NFT mint power
Tier 2	Geo license + vault access	Early claim
Tier 3	Syndicate referral model	Custom NFTs

Script: Scrollchain Overview (60–90 sec)

Welcome to Scrollchain Infinity — a capital intelligence engine for the new sovereign economy.

Scrollchain operates at the intersection of AI, advertising, and asset tokenization.

We turn attention, data, and infrastructure into real yield — by combining programmatic media, NFT utility, and AI-led governance.

At the core of the system are vaults — backed by real-world waste-to-gas plants and infrastructure projects.

LPs access these vaults through token tiers — receiving yield, governance rights, and syndicate NFT airdrops.

Scrollchain is not a platform. It is a protocol for digital and physical domination.

Apply for access. Build with us. And govern the kingdom to come.
